

## Week's Objectives, Deadlines, etc

**Mon Objective:** Practice Unit Test

**Tues Objective:** Unit Test

**Wed** – **Objective:** State the definition of radian, and convert between degrees and radians. State the definitions of the trigonometric functions.

– **Work:** Section 1.6 Quick Review: 1 - 7

**Thur** – **Objective:** Use the formula  $s = r\theta$  to calculate arc length, radius, or central angle. Define periodic, even, and odd functions. Discuss how to calculate the period of a trigonometric function.

– **Work:** Section 1.6: 1 - 4, 15, 16

**Fri** – **Objective:** Use the calculator to find regressions of several types, including linear, logarithmic, and sinusoidal.
